

### Aim:

Write and execute a Python program to print an even number series of N values.

### Input format:

- An integer N represents the number of terms of the series.

### Output format:

- The output should be the number series.

### Source Code:

series.py

```
# Write your code here...
n=int(input())
i=1
x=0
while(i<=n):
    x=i*2
    i=i+1
    print(x,end=" ")
```

### Execution Results - All test cases have succeeded!

Test Case - 1
User Output
5
2 4 6 8 10

Test Case - 2
User Output
10
2 4 6 8 10 12 14 16 18 20
