Aim:

Write a Python program to print a pyramid pattern as shown in the sample test cases.

Input format:

The input should be the number of rows to print a pyramid.

Output format:

The output should be the pyramid.

Source Code:

pyramid.py

```python
#Type Content here...
n=int(input())
for i in range(n):
    for j in range(n-i-1):
        print(" ",end="")
    for k in range(2*i+1):
        print("*",end="")
    print()
```

Execution Results - All test cases have succeeded!

Test Case - 1
